EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Delaney on 7-14-04. The application has been amended as follows:

- Claim 51, line 7, "action" has been deleted.
- Claim 54, line 2, "action" has been deleted.

Art Unit: 1762

2. The following is an examiner's statement of reasons for allowance: The method for producing a printed workpiece comprises supplying raw thermoplastic material which is processed via heat and molding into a molded material with a heated surface kept at a material reactive state (meaning the subsequently applied toner permanently bonds with this surface, specification page 1, 28-29; page 2, 6-7; etc); printing a thermoplastic toner onto the heated surface while in its material reactive state due to the processing; and allowing hardening to establish a permanent bond between the toner and molded workpiece.

The closest prior art is as follows: US 4510225; 5112717, 4927727, 5392096, 4489122, and 5920756 teach applying toner to a formed polymeric substrate, in which heating or heat/ pressure are used to form toner images. US 5629050 specifically teaches coating formed molded or extruded articles using "any suitable electromotive coating process". The prior art does not teach printing onto the molded article while it is in a material reactive state due to processing/ forming (heating and molding) rather than printing onto a previously molded/ extruded and subsequently heated article as disclosed by the prior art. It is the Examiner's opinion that the Stated Prior Art does not teach, nor fairly suggest to combine, the cited references to produce the invention in this Application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
